Where science meets consciousness...

What Out-Of-Body Experiences Teach Us About Life and Afterlife

*workshop with **Nanci Trivellato, MSc.***

Nanci Trivellato will present the “mysteries” around death which have historically been confined to religious, philosophical, or mystical fields, rather than science. Although this started to change in the past decades, most studies remain isolated, delivering non-integrated research findings. Part of this is because few scientists have dispassionate, direct experience of the reality beyond our physical world, which limits or distorts the interpretation of the data obtained.

Based on her personal out-of-body and psi experiences and in her expertise of almost 30 years of investigation in this field, Nanci will talk about about some of the different types of situations observed in the afterlife dimension and will discuss how they can affect one’s life and death. In this intriguing, revealing and informative course, Nanci will use cases of near-death experiences, out-of-body experiences, and other phenomena or “spiritual” phenomena to illustrate and base the discussions. A brief exercise to increase the frequency of our energy will be performed.

Nanci Trivellato, MSc. in Research Methods in Psychology, is a charter member of the International Academy of Consciousness and the Institute of Applied Consciousness Technologies. Involved in consciousness science since 1990, she has lectured around the world: Australia, Brazil, Canada, Cyprus, Finland, Germany, Japan, Mexico, Netherlands, Portugal, Romania, Spain, Switzerland, the the UK, and the USA. She established *The Journal of Consciousness*, of which she was editor for 15 years, and is author of the book *Vibrational State and Energy Resonance*. Nanci’s TEDx Talk “*How Out of Body Experiences Could Transform Yourself and Society*” is at <https://www.youtube.com/watch?v=NMBNZspm7I>

Hacking Evolution: Subtle Energy As a Technology for Self-Development

*workshop with **Wagner Alegretti***

As it is the main tool for expression of consciousness, subtle energy can be consciously used to improve any aspect of our physical and non-physical existences. With decades of experience since his first out-of-body experience during childhood, and being a consciousness instructor since 1985, Wagner has developed an impressive training approach to make this accessible to anyone interested. Here he will share strategies, practice techniques and useful approaches to achieve such improvements.

Wagner Alegretti is an electronic engineer who worked with electricity generation, medical equipment and software development prior to dedicating to teach and research consciousness and its phenomena. He has been instrumental in furthering consciousness science into the international arena since he moved from Brazil to the USA in 1994, and also in the establishment of the International Academy of Consciousness and its research campus, of which he was president from 2001 to 2014. He has presented at many international congresses, courses and events, including TEDx and The Science of Consciousness conference (Tucson, Arizona, USA). Wagner was an FMBR speaker/workshop presenter in 2015. His TEDx talk: https://www.youtube.com/watch?v=Kr85BurAW_k

Saturday February 24, 2018

Nanci’s workshop is 10AM-1PM, Wagner’s workshop is 2PM-5PM

146 Main St., Los Altos, CA 94022

\$80 for one workshop or \$150 for both
